Subject: Microsoft Settlement

I am utterly dismayed with the Department of Justice's proposed Microsoft settlement, because it is so full of loopholes that Microsoft will have no legal fetters to curb their predatory behavior. Just as happened with the first antitrust decree, of February 14, 1995, wherein Federal Judge Stanley Sporkin refused to approve the consent decree negotiated between the U.S. Government and Microsoft to settle the antitrust complaint filed against Microsoft by the Government at that time, Microsoft will be able to skirt around the terms of the present settlement offered by the Department of Justice, because it is just too full of holes. Stop Microsoft's predatory behavior NOW, by throwing out the Department of Justice's proposed settlement and demanding a settlement that will have strong controls over Microsoft's behavior. The present Department of Justice proposed settlement is an atrocious miscarriage of justice.
